

### **5.03 HEALTH SERVICES**

- 5.03.01 School nursing services will be provided by the Dane County Public Health Department.
- 5.03.02 The goals and objectives of the health department staff are focused on the following:
1. Health Education - presentation of programs related to health promotion and disease prevention
  2. Communicable Disease Control - responsibility for the prevention and control of communicable disease
  3. Health Screening Programs - provide vision screening and hearing screening
  4. Emergency Nursing Services – participate in committees convened for the purpose of developing and reviewing emergency nursing and medication administration policies and procedures for schools
  5. Student Health – case finding and referral services for children (and families) with health needs
- 5.03.03 Emergency care for accidents and illness at school will be coordinated with the Dane County Public Health Department. Secretaries, educational assistants, coaches, bus drivers and other personnel will be given first aid and CPR training so each building and/or program has appropriate first aid available. These trained personnel will be designated as first responders in emergencies. The EMS, Dean Clinic, and Physicians' Plus Clinic also may be called.
